PATENT PENDING

Safe Tap Tags

- Easy to fit behind wall mounted bath & shower taps
- Show water temperature and flow at a glance
- Create independence in children
- Maintain independence in adults & persons with low vision
- Remove easily for cleaning

Is your bathroom safe for kids?

Dear Fundraising Group,
 Are you looking for a fundraising product that is not only easy to sell, but also a great benefit to your child's safety and independence?

StickySignz is offering parents a way to help teach their children about hot water safety at home, through a new signage system that fits easily onto all wall mounted shower and bath taps - Safe Tap Tags.

The family bathroom accounts for 80% of all hot water scalds and each year, over twelve hundred Australian children visit hospital emergency departments needing treatment. **Safe Tap Tags**, show you the way to safely operate your shower & bath taps to prevent hot water scalds. The colour graded arrows show you how to reduce the flow of hot and increase the flow of cold water.

Safe Tap Tags in the family bathroom will help your children on their way to independent showering and bathing.

Safe Tap Tags sell for \$12.00 per pair, and **StickySignz return 20% of all sales** to your school or organisation.

Yes, we would like to register for a "Safe Tap Tags" Fundraiser.
